## Ailunce HA1UV Firmware Update Operation

For Ailunce HA1UV, the firmware can be update via the software.

Firstly, download the Retevis HA1UV CPS and USB Driver, and the firmware update file from the following link:<u>https://www.ailunce.com/Supports/HA1UV/Software</u>

Secondly, Find "Firmware" under the Operation menu.

Then, connect the USB cable to your computer. Choose the correct COM port, and select model "HA1UV".

Here please note that, the com port should display as below picture show:

✓ ∰ 端口 (COM 和 LPT) 員 USB-SERIAL CH340 (COM9)

Next, Select bin file "HA1UV-V1.01.10.009-20250109-app.bin"

Then, make the radio enter the DFU mode.

Keep the radio powered off, then press and hold the PTT and PF1 button together, then turn on the radio. It will enter the DFU mode, and the indicator is red.
